The work described in this thesis was performed in the research group Physics of Nanodevices of the Zernike Institute for Advanced Materials at the University of Groningen, the Netherlands. The project was funded by the European Research Council via ERC Starting Grant 279931. The project profited from facilities funded through the Dutch national NanoLabNL initiative, and from collaboration with projects funded via the research programmes of the Dutch Foundation for Fundamental Research on Matter (FOM) and the Netherlands Organisation for Scientific Research (NWO).

# Two-laser spectroscopy and coherent manipulation of color-center spin ensembles in silicon carbide

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector Magnificus Prof. E. Sterken  
 and in accordance with  
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 23 September 2016 at 12.45 hours

by

**Olger Victor Zwier**

born on 20 September 1987  
 in Groningen, the Netherlands

**Supervisor**

Prof. C. H. van der Wal

**Assessment committee**

Prof. M. A. Loi

Prof. R. Hanson

Prof. N. T. Son

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Prospects of Quantum Information Science . . . . .	1
1.2	Qubits . . . . .	2
1.3	Color centers in silicon carbide . . . . .	3
1.4	Electromagnetically Induced Transparency . . . . .	5
1.5	Goals of this research . . . . .	6
1.6	Appendix: Lattice and defect geometry . . . . .	9
<b>2</b>	<b>All-optical coherent population trapping with basal plane diva-</b>	
	<b>cancy spin ensembles in silicon carbide</b>	<b>11</b>
2.1	Introduction . . . . .	12
2.2	The divacancy and its spin . . . . .	12
2.3	Experimental results and modeling . . . . .	15
2.4	Coherent population trapping . . . . .	19
2.5	Conclusions and outlook . . . . .	21
2.6	Summary of methods . . . . .	21
2.7	Appendix: Sample design . . . . .	24
2.8	Appendix: Rate model of two-laser spectroscopy . . . . .	25
2.9	Appendix: Modeling of Coherent Population Trapping . . . . .	30
2.10	Appendix: Angular dependence of CPT . . . . .	31
2.11	Appendix: Bleaching and charge state dynamics . . . . .	32
<b>3</b>	<b>Optical magneto-spectroscopy on the ground and excited state</b>	
	<b>spin structure of c-axis divacancies in 4H-SiC</b>	<b>35</b>
3.1	Introduction . . . . .	36
3.2	C-axis divacancy spins in irradiated 4H-SiC . . . . .	37
3.3	Spin-related absorption . . . . .	39
3.4	Method: dual-laser transmission spectroscopy . . . . .	42
3.5	Experimental results and modelling . . . . .	44

3.5.1	Spin-related absorption features: two groups . . . . .	44
3.5.2	Proving the SRA groups come from different defects . . . . .	47
3.5.3	Identifying group A with magneto-spectroscopy . . . . .	49
3.5.4	Explanations for the suppressed $\Pi_1$ SRA feature . . . . .	52
3.5.5	Identifying group B with magneto-spectroscopy . . . . .	55
3.6	Summary and conclusions . . . . .	58
3.7	Appendix: Polarization dependence . . . . .	59
3.8	Appendix: Temperature dependence . . . . .	60
3.9	Appendix: Harmonic SRA overtones . . . . .	61
3.10	Appendix: Magneto-spectroscopy of PL1 . . . . .	64
<b>4</b>	<b>Electromagnetically Induced Transparency with c-axis divacancy spin ensembles in silicon carbide</b>	<b>67</b>
4.1	Introduction . . . . .	68
4.2	Model of EIT in inhomogeneously broadened spin ensembles . . . . .	69
4.2.1	EIT in SRA features . . . . .	69
4.2.2	Transition frequency and laser field inhomogeneity . . . . .	72
4.3	Transmission spectroscopy . . . . .	75
4.4	Experimental results and modelling . . . . .	76
4.4.1	A single, robust, and isolated SRA $\Lambda$ system . . . . .	76
4.4.2	Extracting decay and dephasing rates and dipoles . . . . .	79
4.4.3	Temperature dependence of SRA and EIT . . . . .	80
4.5	Prospect: a quantum memory for light . . . . .	82
4.6	Summary and conclusions . . . . .	85
4.7	Appendix: Initial result high-power control beam, low-power probe beam . . . . .	86
4.8	Appendix: Master equation in Lindblad form . . . . .	87
4.8.1	The Hamiltonian and the Rotating Wave Approximation . . . . .	89
4.8.2	The density matrix in a rotating frame . . . . .	91
4.8.3	The Lindblad superoperator . . . . .	93
4.8.4	Solving the steady-state equations . . . . .	94
<b>5</b>	<b>Exploring the spin structure of the Molybdenum impurity in 4H-SiC</b>	<b>95</b>
5.1	Introduction . . . . .	96
5.2	Experiment . . . . .	97
5.3	Single laser spectroscopy results . . . . .	99
5.4	Two-laser spectroscopy results . . . . .	101

---

5.4.1	Characterization of the homogeneous linewidth . . . . .	101
5.4.2	Spin-related emission magneto-spectroscopy . . . . .	103
5.4.3	CPT-like sharp SRE features . . . . .	105
5.5	Analysis . . . . .	107
5.5.1	Modelling the line positions . . . . .	107
5.5.2	Optical spin pumping: an additional metastable state . . .	110
5.6	Summary and conclusions . . . . .	112
